Simple and Complex Sentences

When you include different punctuation in your writing you must always keep in mind that you are trying to get your points, your message and your story across to the reader. Every choice you make in terms of words, sentences, arrangement, punctuation, has an effect — good, bad, or mediocre — on the reader. Try to plan your choices for the best effect.

Today we are going to focus on using paired commas. To fully understand how to include paired commas we must first understand simple and complex sentences.

Simple Sentences

A simple sentence is made of one main clause = **subject** + **verb**.

A simple sentence is usually straightforward and it must make sense on its own, as it expresses a complete thought.

A simple sentence can have phrases, adjectives, and adverbs, but no subordinate clauses.

The **students** **were** sleepy.

The **helicopter** **frightened** the dogs.

Complex Sentences

A complex sentence has at least:

- One subordinate clause.
- A main clause.

Subordinate Clauses:

- Must have their own subject and verb.
- Do not make sense on their own.
- Can come before, after, or inside of the main clause.

Main Clauses:

The more important information should always go in the main clause because the main clause always “carries” more emphasis than the subordinate clause.

The **students** **were** sleepy because **they** had been **partying** all night.

Can you identify the **main clause**?

The **helicopter** **frightened** the dogs so **they** **barked** loudly.

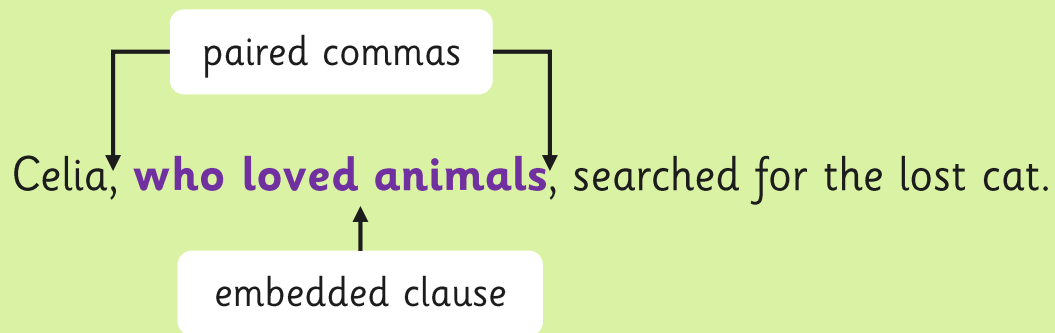

Can you identify the **main clause**?

Embedded Clauses

The word embedded means 'within'.

An embedded clause is another way of using a subordinate clause – by dropping it into the middle of a sentence. This time you need two commas, one either side of the clause.

The embedded clause is a **parenthesis**.

Parenthesis = a word or phrase inserted as an explanation or afterthought into a passage which is grammatically complete (the sentence makes sense) without it.

Simple and Complex Sentences

The headteacher, who hated chaos, felt frustrated at the
noisiness of the children.

Embedded Clauses

Commas are used before and after embedded clauses (a group of words that includes a subject and a verb). The embedded clauses are put into a sentence to add additional detail for the reader. The embedded clauses do not make sense by themselves. Starting the embedded clause with where, which, who or when is a useful tool to help when first using embedded clauses. When we start the clause in this way we call it a relative clause.

Example:

The spy scanned his surroundings looking for danger.

Is changed to:

The spy, who blended into the crowd, scanned his surroundings looking for danger.

Diagram illustrating the transformation:

- A box labeled "commas" has arrows pointing to the spaces before and after "who blended into the crowd".
- A box labeled "embedded relative clause" has an arrow pointing to the phrase "who blended into the crowd".
